- Featured Event: The Future of Mobile Broadband – 5G
- 22 Sep 15
- Hood River
- [Suggestions for an event?](#)
- 31 Dec 15

Peter Rysavy, President of Rysavy Research ([www.rysav.com](http://www.rysav.com)), works with organizations globally to analyze current and future capabilities of wireless technologies, including cellular and Wi-Fi. He also works as a wireless expert in patent litigation. Peter will explain how 5G will dramatically expand mobile broadband capabilities, how and when operators will phase in 5G, how new wireless technology will expand use cases for the Internet of Things, how wireless will let more people cut the broadband cord, and the raging wars for the precious commodity of spectrum.

Appetizers and networking included. \$10 for non-GTA members; free for members.

**THE GTA IS GORGE ROBOTICS!**

The GTA is the organizing force behind [Gorge Robotics](#), our regional source for youth robotics news, information and events. Contact [Jessica](#) to ask how to get involved or provide a contribution.
