

STATE OF THE NET

America's Premier Internet Policy Conference

A photograph of the Lincoln Memorial in Washington, DC, taken at sunset. The sun is low on the horizon, casting a warm orange and red glow across the sky and reflecting in the water in the foreground. The memorial is centered in the background, flanked by trees.

January 29, 2018

THE NEWSEUM ★ WASHINGTON, DC

 Casey Horner

Everyone is an Internet
Stakeholder ... even if they don't
know it yet.

Wireless: We Need a New Generation to Connect The Internet of (Every)Things

Paul Kirby, Senior Editor, TR Daily (*Moderator*)

Julius Knapp, Chief, Office of Engineering and Technology, Federal Communications Commission

Karen Charles Peterson, Commissioner, Massachusetts Department of Telecommunications and Cable

Peter Rysavy, President, Rysavy Research

Crystal Tully, Policy Director & Counsel for Communications and Technology, Senate Commerce Committee

We are on the cusp of a generational shift in wireless networks. New generations are displacing old ones -- because they have to. The next generation of wireless Internet -- dubbed 5G -- is coming at us at lightspeed because radically new technology is required to facilitate augmented reality, autonomous cars, and the Internet of Things (IoT). Chances are your recent holiday shopping spree included quite a few IoT devices, meaning you'll likely benefit from the higher speeds of 5G. However, before you can kick back and enjoy a 5G-powered smart home, the future will require creative engineering, bold policy decisions, and all of us working in the same direction. Our panel will look at the near future of 5G wireless -- if we can make it happen.

Getting There

Newseum, Knight Conference Center
555 Pennsylvania Avenue Northwest
Washington, D.C., District of Columbia 20001 ([map](#))
(202) 292-6100
