Webinar: 5G: Opportunities and Threats for the Channel

Written by Buffy Naylor

Wednesday, December 5, 2018

2:00 p.m. ET

As 5G networks roll out across the U.S. market, the technology could revolutionize B2B communication at a fundamental level, thanks to vastly greater data transmission rates, massive capacity, dramatic reduction in latency, mission-critical capability, network slicing and private deployment options. Of course, with any revolution, there are winners and losers.

In this Channel Partners webinar, noted 5G analyst Peter Rysavy of [Rysavy Research](#) will join us to discuss topics including:

- Outlook for 5G rollouts in the U.S. and globally, 2019-2021
- Key 5G capabilities and why it is transformative for society and the economy
- What you need to do now to get ready

Speaker

Peter Rysavy is the president of Rysavy Research LLC, a consulting firm that has specialized in wireless technology since 1993. From 1988 to 1993, he was vice president of engineering at Traveling Software (later renamed LapLink) and before that spent seven years at Fluke Corp.

An expert on the capabilities and evolution of wireless technology, Rysavy has written more than 175 articles, reports, columns and white papers, has taught more than 40 public wireless courses and webcasts, and has performed technical evaluations of many wireless technologies. From 2000 to 2016, he was the executive director of the Wireless Technology

Association, an industry organization that evaluated wireless technologies, investigated mobile communications architectures and promoted wireless data interoperability.
