

# Connected Aviation Intelligence

Advancing In-Flight Networks: AI. Cyber. Data.

The Summit brings together airlines, private jet operators, connectivity service and solutions providers who provide networking, keynote speakers and exhibits of the most innovative connected aircraft technologies in the world.

June 1-3, 2022 | Hyatt Regency Reston | Reston, VA

## 2022 AGENDA

### • 5G C-Band: What's the Long-Term Solution for the US Aviation Industry?

11:00 AM - 11:45 AM | Wednesday, June 01

The FCC is auctioning more bandwidth for 5G services. Most agree this is a good thing, as there is a huge demand for faster, more efficient data services. However, there is evidence that there could be interference issues potentially caused by 5G C-band services on the radio altimeter systems that some airliners, business jets and general aviation aircraft rely on. In this interactive session, we hear from experts on both sides of this issue working toward a long-term resolution that will allow 5G C-band wireless services and flight operations to safely co-exist.

**Woodrow Bellamy III | Moderator**  
Editor-in-Chief, Avionics International

**Anthony Rios | Speaker**  
President, Freeflight Systems

**Peter Rysavy | Speaker**  
President, Rysavy Research

**Frank Sanders | Speaker**  
National Telecommunications and Information Administration

**Sameh Yamany | Speaker**  
Chief Technical Officer, VIAVI Solutions
